-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 8, 15, 25, 32, 39, and 43, 49-51, drawn to a handoff method between a first network and a second network, classified in class 455, subclass 436.
 - II. Claims 2-7, 9-14, 16-18, 26-31, 33-38, and 40-42, drawn to a method of initiating handoff method between a first network and a second network based on borders and non-border nodes sources, classified in class 455, subclass 439.
 - III. Claims 19, 21, 23, 44, and 45, drawn to a method of mobile handover between first and second network dependent on the detection of a mobile's movement, classified in class 455, subclass 441.
 - IV. Claims 20, 22, 24, and 47, drawn to a method of handoff between a first and second network specifically based on information detected at certain time instances, classified in class 455, subclass 181.1.
 - V. Claims 46 and 48, drawn to a method of deciding handover procedure between a first and second network based on overlapping coverage between border and non-border access nodes, classified in class 455, subclass 443.

Art Unit: 2683

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of groups II-V are not required by the system of group I. The subcombination has separate utility such as an initiating handoff method between a first network and a second network based on borders and non-border nodes sources, or a method of mobile handover between first and second network dependent on the detection of a mobile's movement, or a method of handoff between a first and second network specifically based on information detected at certain time instances, or a method of deciding handover procedure between a first and second network based on overlapping coverage between border and non-border access nodes .

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2683

3. A telephone call was made to Peter Albert (312-832-4553) on 2/1/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Huynh whose telephone number is 571-272-7866. The examiner can normally be reached on M-F 8am-5pm.
